- Easy to install
- Uniform, flat surface
- Lightweight yet rigid
- Versatile and easily formable
- Highly resistant to weather and other damaging atmospheric conditions
- Available in a large range of colours and finishes
- We can match any RAL, NCS, BS or Pantone reference in a range of widths, available with low minimum order quantities

ALUPANELXT

Architectural Aluminium Composite Material

Made in England...

...on our purpose-built high speed production line using the most advanced technology in the industry, Alupanel® is the only aluminium composite panel made in the UK.

Covering an area of more than 10,000 square metres, our multi-million pound facility has annual capacity to produce in excess of five million square metres of Aluminium Composite Panels using the very best raw materials from European suppliers.

UK production not only enhances the already high standards of Alupanel® but it also reduces delivery times and enables us to respond more quickly to customer demands.

Quality - Guaranteed

We are confident that our high manufacturing standards result in panels that are second to none.

Alupanel XT panels are guaranteed according to the selected finish - please contact us for further details.

ALUPANELXT

perfect for cladding

Endless Possibilities

Offering an unrivalled combination of quality and value, Alupanel XT® panels are available in an impressive range of colours and finishes. In addition to our standard range, we have the flexibility to match almost any colour reference, helping us to provide unlimited design options to create unique, innovative and eye-catching facades.

Also available, Alupanel XTFR® is made to the same exacting Alupanel XT® standards but has a fire-resistant mineral core to satisfy the requirements of improved fire classification.

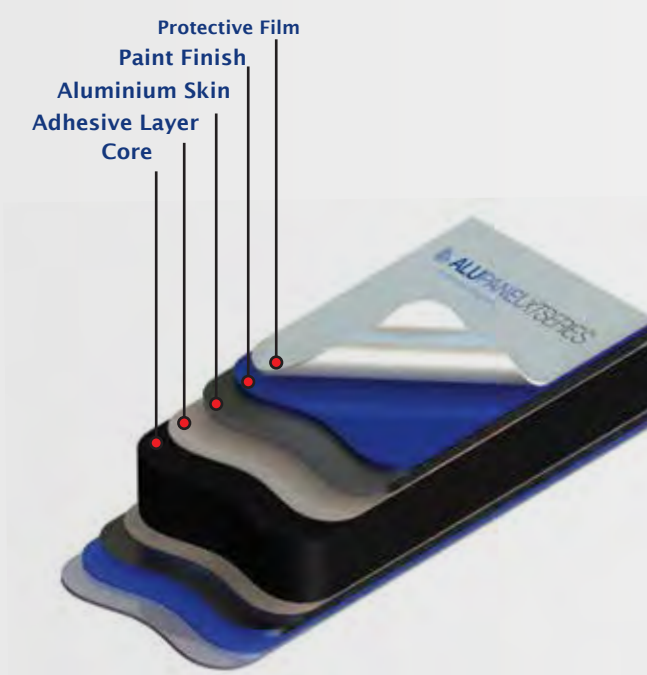

Protective Film
Designed to protect the panel during storage, transit and installation.

Paint Finish
Multi-layer paint systems available in virtually any colour.

Aluminium Skin
High grade aluminium providing superb flatness and rigidity.

Adhesive Layer
Co-extruded to give superior adhesion.

Core
Superior XTPE and XTFR cores offer a range to suit any project.

Coil Coatings

Our aluminium coils are coated in a continuous, highly automated process according to ECCA and NEN-EN standards. The cleaning, pre-treatment and paint application for our coils combine to provide unquestionable qualities in durability and sustainability.

Multipanel and the Environment

Multipanel operate in compliance with all applicable environmental legislation and hold all relevant certification for our products.

We are dedicated to the reduction of toxic emissions and strive to work to best environmental practices in everything we do. Alupanel® can be fully recycled.

Panel Thickness

4.0 mm & 6.0 mm

Aluminium Skin Thickness

0.5 mm

Standard Widths (mm)

1000, 1250, 1500, 2000

Lengths (mm)

From 1000 to 7000

MultiColour

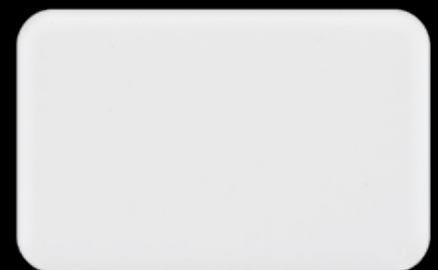

The XT range offers complete freedom in design and creativity. Using a variety of paint types we are able to achieve virtually any colour with any gloss level allowing your imagination to be the only limitation.

Solid Colours

We are able to match any RAL, NCS, BS or Pantone reference
(Subject to Minimum Order Quantities)

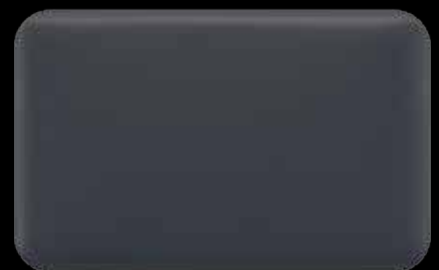

Solid colour are a non-directional finish

XT Traffic White / RAL 9016

XT Stone Grey / RAL 7030

XT Anthracite Grey / RAL 7016

XT Traffic Yellow

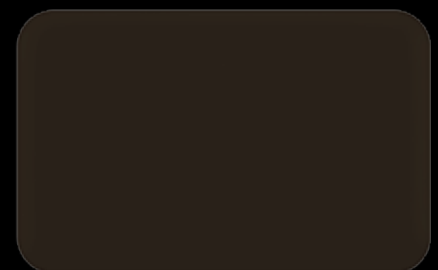

XT Pale Green

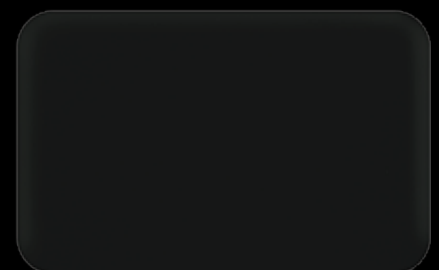

XT Ultramarine Blue / RAL 5002

XT Traffic Red

XT Sepia Brown

XT Jet Black / RAL 9005

Due to the fantastically flat properties of Alupanel XT, super high gloss finishes can be achieved to offer an additional dimension in design to engage with light and reflection.

High Gloss

XT Ferrari Red

XT Silver Metallic / RAL 9006

XT Dark Grey Metallic / RAL 9007

XT Bronze Metallic

XT Blue Metallic

XT Copper Metallic

XT Gold Metallic

Metallic Finishes

Entire projects should be ordered in one batch to ensure consistent finish.

To avoid differences in reflectional qualities, panels with metallic finishes should be installed in the same direction.

MultiFinish

ALUPANELXT
Architectural Aluminium Composite Material

The MultiFinish collection offers the very best natural metals coated with transparent or semi-transparent lacquer to display the innate beauty of the material in its raw form.

This truly contemporary range provides quality and splendour with high gloss and Jewel-like colours for a remarkably majestic facade option.

Diverse, modern & bespoke tailored finishes available

XT Bright TL

XT Quartzinc Brushed

XT Bright Brushed

XT Titanium TL

XT Titanium Brushed

XT New Gold Brushed

XT Obsessive Pearl - Mica

XT Samurai Stainless

XT Aerospace Titanium

XT Canyon Copper

XT Glamorous Gold

XT Galactic Diamond

XT Onyx White Blue - Mica

XT Pyrite Copper Orange Gold - Mica

XT Pyrite Red Green - Mica

Mica Pigments
 use reflection and refraction to create amazing transformations in colour and tone that vary according to the viewing angle and light intensity

Entire projects should be ordered in one batch to ensure consistent finish - this is particularly important for natural metal finishes.

To avoid differences in reflectional qualities, panels with metallic finishes should be installed in the same direction.

Some finishes are only recommended for end use more than 1500 metres from coastal areas.

No end use in heavily industrial or corrosive environments.
